

SAVE TIME AND REPEL
DIRT, SOAP AND GRIME
WITH METRO EZYCLEAN
TECHNOLOGY

Untreated

Metro EzyClean[®]

Applied in our state-of-the-art manufacturing facilities, Metro's unique EzyClean Technology[®] provides a protective coating that creates a long lasting, invisible shield on your home's glass surfaces.

Water will simply bead off the glass surface, resulting in cleaning time being significantly reduced. And it also makes cleaning simple, only requiring the use of water and a mild detergent or microfibre cloth.

Compared to ordinary glass, Metro EzyClean Technology[®]:

- + resists staining from hard water deposits
- + does not support the growth of bacteria
- + eliminates the need for harsh and abrasive cleaning products
- + protects against the build-up of soap scum, body oils, dirt, and grime

So whilst glass protected with EzyClean Technology saves time and effort, it also stays cleaner longer, creating a more hygienic environment.

Warranty:

Provided the glass is maintained according to published after-care instructions and without the use of abrasive cleaning methods or highly alkaline products, Metro Performance Glass warrants Metro EzyClean Technology for ten years from the date of manufacture.

Care Instructions:

To keep your glass looking new, the glass needs to be cleaned each week using a damp microfibre cloth and a mild detergent to remove any soap scum and grime from the glass. Be careful not to use any rough, gritty, highly acidic, alkaline or abrasive cleaners such as Jif, Ajax or cerium oxide as they may damage the protective coating.

For areas with hard water or well/bore water, due to a higher concentrate of mineral deposits such as lime and

calcium, a build-up may occur on the protective coating and may not be easily removed with a mild detergent. A solution of white vinegar and water (1 part vinegar to 5 parts water) should be sprayed onto the glass and allowed to soak for several minutes. This will dissolve any mineral deposits that have built up on the glass surface. A damp microfibre cloth should then be used to wipe over the glass.

When you see this symbol you know EzyClean Technology has been applied to the glass.
