

THE MODERN, CLEAN LINES OF GLASS BALUSTRADES FOR EVERY PART OF THE HOME

Clear, toughened or laminated glass and stainless steel or powder coated fixings for internal and external balustrades, pool fences, wind breaks and stairwells.

HARDWARE AND GLASS OPTIONS

This document is intended as an indicative guide only to help in selection of balustrade options. It should be noted that your glass balustrade design is multi-dimensional, between the substrate the fixings are attached to, the glass types that are possible with this fixing, and the need (or not) for an interlinking rail or handrail.

			Toughened Glass with Handrail				Toughened Laminate Handrail or Bracket				Toughened Rigid Laminate No Rail Required				
			10.00	12.00	15.00	19.00	13.2	13.52	15.20	17.20	21.20	13.52	15.52	17.52	21.50

NOTES:
 Concrete and Steel Substrate only MB75 and MB100.
 * For Pool Fences Gates and Latch Hardware is only available for 12.00mm Toughened Glass.
 Windbreaks are driven by the wind zone for the house location, typically channels are only suitable for fixing to stub walls. For higher wind breaks generally posts or spider fittings will be required.
