

Railing/Handrail Systems

Interlinking rails and handrails offer protection from falling. A range of styles and options are available from continuous interlinking rail designs fixed to the top of the glass edge to attractive standoff brackets fixed to the glass or mounted to frameless posts.

PRODUCT OVERVIEW

Railing/Handrail

Metro Frameless Glass balustrade systems are typically fitted with an interlinking top rail finished in either a stainless steel or a powder coat colour that matches the balustrade. New regulations introduced in June 2016 require all monolithic glass frameless balustrades to be fitted with a continuous, interlinking rail (that is fixed to a building element).

Our range of handrail systems combine slim profiles with ergonomic and contemporary styling. Options include a top rail mounted on the glass edge, or side-mounting to the wall or glass using our stainless steel handrail brackets. Our capping rail will provide glass edge protection and is able to be fitted retrospectively.

Note: An interlinking top rail is not required on frameless glass pool fencing.
